

ERIN BELLVANI SALSABILA

SOFTWARE DEVELOPER

08113601676 | erinbs.ebs@gmail.com | linkedin.com/in/erinbellvani | https://erin-portfolio-web.vercel.app

Trenggalek, Indonesia

Informatics graduate from Universitas Muhammadiyah Malang with a strong focus on Web Development and UI/UX Design. Proficient in React.js, TypeScript, HTML, CSS, and JavaScript, with hands-on experience slicing Figma designs into responsive and user-friendly web applications. Currently expanding into Back-End Development with Node.js and familiar with Laravel, aiming to grow as a full stack developer in a dynamic and innovative environment and make meaningful contributions.

Work Experience

PT Ghifra Utama Indonesia - Jakarta, Indonesia

May 2026 - Present

Full-Stack Developer

- Developed a full-stack Internal Marketing Data Warehouse (MarketDW) using Node.js, Express.js, PostgreSQL, React, Vite, and Tailwind CSS v4, consolidating 5 marketing data sources (marketplace, social media, web traffic, competitor ads, and customer behavior) into a single internal platform.
- Designed a 7-table dimensional database schema and built a modular ETL pipeline with node-cron scheduler running every 6 hours to automate data collection across all sources.
- Built a real-time analytics dashboard with 6 pages and 5 chart types using Recharts, covering KPI summaries, trend analysis, and a pipeline control panel with manual trigger and run history.
- Developed the Bhumara mobile app UI in Flutter, a toddler health monitoring and nutrition education app with screens for growth tracking, educational content, and an admin content management panel.

Skribble Lab Sdn Bhd - Malaysia

May 2026 - June 2026

Software Developer

- Delivered 7 backend features for a school management system across 3 sprints (10 days each), including employee data extensions, bulk operations with status-based restrictions, grading scheme validation, timetable management, filter functionality, and 7 Excel export reports for student data.
- Ensured code reliability by writing unit tests per query using Pest PHP and validating REST API endpoints through Bruno, alongside producing API documentation to support team maintainability.
- Collaborated with cross-functional developers in weekly sprint meetings, managing tasks via Jira and applying advanced Git workflows including cherry-pick, diff-based code review, and HEAD reset.
- Underwent regular code reviews with a senior developer per completed feature, iterating based on feedback to improve code quality and align with team standards.

PT. Talenta Sinergi Group - Yogyakarta, Indonesia

Aug 2022 - Dec 2022

Front-End Programmer

- Developed an LMS for mentors using React.js, including a forum with search, filter, and tag features, a drag and drop curriculum dashboard, and a CMS, completing the full project 25% ahead of the 4 month internship schedule by leveraging AI powered development tools.
- Translated Figma designs into clean and production ready React.js components with high fidelity, accelerating development cycles and reducing debugging time through strategic use of AI tools.
- Built a Q&A interface inspired by Stack Overflow and a content management system using React.js, enabling mentors to manage and edit learning materials more efficiently.

Boosternesia - Kolaka, Indonesia

Sep 2021 - Dec 2021

Web Developer and Digital Marketing Staff

- Revamped the Boosternesia website using HTML, CSS, and Bootstrap, improving UI responsiveness across mobile, tablet, and desktop devices.
- Managed Instagram content strategy including content planning, caption writing, and weekly scheduling over 4 months, growing followers to nearly 1,000 and doubling average post engagement.
- Increased average post likes from under 50 to nearly 100 through consistent content execution and improved visual presentation.

Project Experiences

Video Belajar Web - Harisenin Project

Jun 2025 - Present

Full-Stack Developer

- Developing a full stack learning platform using React.js, Axios, and Node.js, featuring CRUD API integration for course management, real time server side data connection, and a detailed course view linked directly to a live database.
- Designed the database architecture by creating an ERD to structure and plan course data relationships, ensuring scalability for future features.
- Currently expanding the platform with payment method integration and an interactive quiz feature to enhance the overall learning experience.

Job Portal Web - Sanbercode Project

Jul 2023

Front-End Developer

- Built a job portal website using React.js and Axios, featuring role based access control where only admins can create, update, and delete job listings, while regular users can browse and view detailed information on jobs they applied for.
- Implemented authentication and authorization to secure login sessions and protect data management features based on user roles.

Education Level

University of Muhammadiyah Malang - Malang, Indonesia

Oct 2020 - Mar 2024

Bachelor Degree of Computer Science, 3.96/4.00 (Cumlaude)

- Thesis: UX Journey Approach in Designing a Learning Application for Children: Needs Analysis to Enhance Motivation in Learning
- Relevant Course Works: Algorithm Programming, Database, Web Programming, Software Engineering, Data Structures, Object-Oriented Programming (OOP), Software Design.

Courses, Training and Certifications

Harisenin.com - Jakarta, Indonesia

Jun 2025 - Nov 2025

Full Stack Web Developer Bootcamp

- Final Project: Designed and developed a Video Belajar Website, completed the bootcamp within four months.
- Relevant Course works: HTML, CSS, JavaScript, React.js, Typescript, Redux, and Node.js.

Sanbercode.com - Bandung, Indonesia

Jun 2023

Web Frontend Development

- Final Project: Designed and developed a job portal website, within one month.
- Relevant Course works: HTML, CSS, JavaScript, React JS, Axios.
